Adam Deryło

EDUCATION

Warsaw University Oct. 2020 – Ongoing

Double degree: BSc in Computer Science & BSc in Philosophy

Warsaw, Poland

- Top rated CS undergraduate program in Poland according to QS ranking.
- Rector's scholarship for academic achievements.

EXPERIENCE

Taiwan Semiconductor Manufacturing Company

Jul. 2023 - Sep. 2023

 $Software\ Engineering\ Intern\ --\ Pytorch,\ Hugging face,\ Scikit-learn,\ Python$

Hsinchu, Taiwan

- AI Application and Platfrom Development team responsible for automation of fab processes.
- Developed custom BLIP2 based model for photomask defect classification and dataset bootstrapping.
- Prototyped application of Stable Diffusion models for bootstrapping rare defect data quickly.
- Ranked top 8 out of 80+ Interns in the final competion.

Goldman Sachs Jun. 2022 - Aug. 2022

Summer Analyst | Redis, Java, Procmon, Golang

Stockholm, Sweden

- Global reconciliations team, daily processing of 80+ mln trade & position data entries.
- Collaborated on optimizing caching performance and reliability of data loading processes.
- Worked on extending database performance limits with intelligent cache priming based on Change Data Capture.
- Developed Redis cache monitoring tool suite to speed up emergency debug and development cycle.

ReSpo.Vision Jul. 2021 - May. 2022

Software Engineer Intern | Python, Postgre, Git, SQL, Pytorch

Warsaw, Poland

- 40+ sprints under the Scrum development framework in a rapidly growing team.
- Worked on a back-end implementation of a betting hints generator that withstood 100k API calls daily.
- Created a deep learning NLP module for context-dependent noun declination.

Projects

Bachelor thesis with NVIDIA | C++, CUDA, Python

Oct. 2022 - Jun. 2023

- Worked with NVIDIA DALI team on accelerating image decompression in astronomy workflows.
- Contributed module to the open-source DALI library, improving the performance of the FITS decoder.
- Showcased the result by rewriting NASA Coronal Hole Semantic Segmentation piepline and achieving 70% speedup.

C interpreter | Haskell, GHC, Cabal, BNFC

Apr. - Jun 2023

- Created an interpreter for a C-like language, called Latte.
- Implemented support for scoping, functions, multidimensional arrays, classes and many more.
- Utilized monad transformers to create various features such as garabage collection mechanism for the language.

Minix OS $\mid C$, Quemu, Bash, rsync

Apr. - Jun. 2023

- Developed various custom features for the Minix OS, including modifying the kernel.
- Implemented theoretically optimal scheduler, improving the performance of the system.
- Devised an add-on for the virtual file system which introduced file exclusivity mechanism.

Distributed alerting system | Grpc, Google Cloud Platform, Python

Nov. 2022 - Jan. 2023

- Developed scalable microservice system for monitoring services and running complex alerting routines.
- Utilized GRPC, PubSub queues, Cloud SQL and other tools to satisfy SLO requirements.
- Project supervised by Google employees.

Extracurricular

2nd Place, BEST Hacking league

Member, Bain & Company Champions Class 2023

1st Place, Goldman Sachs EMEA 2022 Hackathon

Laureate, 8/1000+ in the 31st National Philosophy Olympiad

SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, R, Ocaml, Go, SQL

Technologies: Git, Fedora/Ubuntu/Debian, Jira, Redis, Docker, Pydantic, React, Cloud Run

Natural languages: English (C2), Polish (Native), Spanish (B1)
